Serial No.: 09/866,923

Docket No.: 108421-00016

IN THE CLAIMS:

1. (Currently Amended) An adhesive film for a display, comprising:

a transparent substrate,

an anti-reflection layer provided on one surface of said transparent substrate,

and

an adhesive layer provided on the other surface of said transparent substrate,

said anti-reflection layer being formed by resin in which low refractive index

material disperses therein, [[and]]

said anti-reflection layer and said adhesive layer each having a predetermined

color for rendering said adhesive film achromatic when said predetermined color of said

anti-reflection layer is mixed with said predetermined color of said adhesive layer, and

said predetermined color of said adhesive layer being colored by a colorant

comprising carbon black.

2. (Previously Presented) The adhesive film according to claim 1, wherein said anti-

reflection layer further has an anti-static function.

3. (Withdrawn) The adhesive film in accordance with claim 1, wherein said anti-

reflection layer contains a hard coat material.

4. (Previously Presented) The adhesive film according to claim 2, wherein said anti-

reflection layer contains a hard coat material.

2

Serial No.: 09/866,923

Docket No.: 108421-00016

5. (Previously Presented) The adhesive film according to claim 1, wherein said antireflection layer is formed by a radiation curable resin.

- 6. (Withdrawn) An adhesive film for a display, in accordance with claim 3, wherein a hard coat layer is provided on the other surface of said transparent substrate.
- 7. (Previously Presented) The adhesive film according to claim 1, wherein said adhesive layer comprises an acrylic adhesive.
- 8. (Previously Presented) The adhesive film according to claim 2, wherein said adhesive layer comprises an acrylic adhesive.
- 9. (Previously Presented) The adhesive film according to claim 7, wherein said acrylic adhesive is copolymerized by at least a monomer having a carboxyl group and/or hydroxyl group.
- 10. (Previously Presented) The adhesive film according to claim 8, wherein said acrylic adhesive is copolymerized by at least a monomer having a carboxyl group and/or hydroxyl group.
